## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being unpatentable over Force (US 6,704,716).

Force discloses a system for trading commodities comprising:

- a selling station configured to generate offer data for said commodity and to transmit said offer data to a server, said server configured to transmit said offer data to one or more buying stations, said buying stations configured to generate counter-offer data and to transmit said counter-offer data to said server, said server further configured to transmit said counter-offer data to said selling station, said selling station further configured to generate an acceptance command accepting the term set forth in any counter-offer data and to transmit said acceptance command to said server, said server configured to transmit the acceptance command and the accepted counter offer data to a clearing station, said clearing station configured to generate a purchase order according to the terms of the accepted counter-offer data, said clearing station configured to transmit said purchase order to said selling station and said buying station (fig.8; col.3, line 9-col.7, line 15).

Art Unit: 3628

- wherein said selling station and said buying station are configured to communicate electronically with each other via said server (100, 120, 122).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Force.

Force discloses an online bidding of a sales item that allows sellers and buyers to negotiate a final sale price of that item and all of above claimed limitations except for a showing of trading seafood online.

Official notice is taken that trading and selling of any commodity online is conventionally well known in the art, it would have been obvious to one of ordinary skill in the art at the time of the invention to use Force's system and method to buy/sell any commodity, including seafood, over the Internet to gain a more competitive advantage in business method of trading and matching buyers to sellers.
